AD 4000

LASER, 3D PRINTING

Last Updated on 13.07.2018

High airflow laser fume extraction system for the laser marking, coding and engraving industries.

BOFA's AD4000 laser fume extraction unit combines large filter capacity with high airflows. This combination makes the AD4000 ideal for large laser engravers, laser cutters as well as multiple laser coding installations.

Easily accessible filters are accommodated by the uniquely styled gas spring assisted 'Gull Winged' doors, which allow for maximum space and ease when changing filters. Unit interfaces such as stop/start and system failure are available as options.
